Lab: Username enumeration via different responses

APPRENTICE LAB Solved

This lab is vulnerable to username enumeration and password brute-force attacks. It has an account with a predictable username and password, which can be found in the following wordlists:

- Candidate usernames
- Candidate passwords

To solve the lab, enumerate a valid username, brute-force this user's password, then access their account page.

A screenshot of a web browser displaying the Web Security Academy administrator panel. The browser's address bar shows the URL '0a4f002e038d9cad80c808fb007400f5.web-security-academy.net/administrator-panel'. The page header features the 'Web Security Academy' logo on the left, the title 'Unprotected admin functionality' in the center, and a green 'LAB Solved' badge on the right. Below the header, a large orange banner contains the text 'Congratulations, you solved the lab!' on the left, 'Share your skills!' with social media icons in the center, and 'Continue learning >>' on the right. The main content area shows the message 'User deleted successfully!' followed by the heading 'Users'. Below this, there is a list of users with the entry 'wiener - Delete' visible. The top of the browser window shows several open tabs, including 'Easy:!', 'stsw://', and various 'Lab: U' and 'Insecu' tabs.
